Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Hill et al. (Patent # 6,023,714).

Regarding claims 1, 2, 3, 8, 9, 10, Hill et al. teaches system for receiving delivery contents composed of

computer language having data attributes, (fig 4 element 402) comprising:

means for storing at least one style sheet defining a representation format of delivery contents composed of instructions of a computer language having data attributes; (fig 2, element 214 a, b, etc, wherein style sheet is stored at server. Also see col. 7, lines 17-20, wherein Hill et al. teaches style sheet with formatting properties)

means for accepting delivery contents composed of instructions of a computer language having data attributes and / or a style sheet; (fig 4, element 404, wherein the receiving means accepts instructions having data attributes and style sheet)

means for prompting a user to select a stored style sheet; (See fig 4, element 408) and

means for applying the style sheet selected by the user to the delivery contents and displaying the accepted delivery contents. (fig 4, element 414)

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hill et al. (Patent # 6,023,714) in view of Boag et al. (Patent # 6,589,291).

Regarding claims 4, 11, Hill et al. teaches the claimed invention as described above. Hill et al. teaches storing style sheet at server. Therefore fails to teach portable storage. However, Boag et al. teaches storing style sheet at either client or server location (See col. 8, lines 50-52, wherein style sheet is retrieved from directory or other repository. Also Boag et al teaches wireless network with wireless client that inherently has portable storing means as shown in fig 2.

Therefore it would have been obvious for a person with ordinary skill in the art at the time the invention was made to incorporate storing style sheet in portable media because it provides faster retrieval and ease of handling.

Allowable Subject Matter

5. Claims 5-7, 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
